

Blind Shipping

i *Blind Drop Shipping is when "Vendor A" places an order with "Vendor B" and instructs "Vendor B" to ship the good to "Vendor A's" customer without any documentation related to "Vendor B" being included in the shipment.*

Reduce Lead Times with Direct Shipments, and same day shipping on all stock items.

Expert Guidance, and fast response times to eliminate stress of the added layer.

With the account portal, save your shipping preferences, map your part numbers, and upload default payment methods for fast and easy checkouts.

All of our information is swapped out for yours on all products, packing lists, shipping labels, box labels and boxes.

How does World Cord Sets Do this?

For our reseller customers, we have an automated workflow that :

1. Defaults the order to be "Blind"
2. Requires a customer supplied packing list if available
3. Requires customer part numbers
4. Defaults the "Shipper Address" on FedEx/UPS labels to be customer's warehouse address.
5. Creates Product Tags and Box Identifiers with customer's logo (if provided) and part numbers. Each carton is labeled with
 - a. Package #
 - b. Weight/Dimensions
 - c. Package Contents (using customer provided part numbers)
