# Locking Power Cords

P-Lock

D-Lock

The P-Lock is a robust locking plug that can mate with Server Tech, Raritan, GELU Power Distribution Units. The Dual-Lock utilizes the P-Lock as well as the newly designed locking connector. This Universal Connector can be locked into place with any standard C14 Inlet, and has been redesigned with a user friendly twist-locking mechanism.
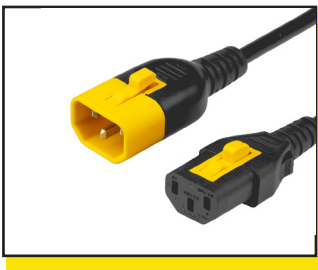

WS-Lock

W-Lock

The WS-Lock is a universal locking connector with a simple to use pinch tabs to disengage. The W-Lock is when this universal connector is combined with a locking plug, designed for use with APC AP8000 Series PDUs. This design is disengaged by pressing on the plastic latch located on the top of the plug.
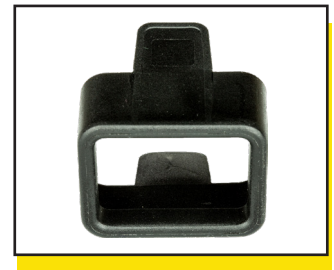

V-Lock

Z-Lock

Secure Sleves

V-Lock Power Cords are used with APC AP8000 series PDUs to lock the C14 or C20 Plug into the PDUs C13 or C19 outlet receptacle.

The Z-Lock is a universally locking power cord that locks on both ends of the power cord. The locking mechanism expands the body of the plug/connector by twisting the red plastic grip.

The secure sleeve is an easy, low cost solution to increase the retention strength of your power cord connections. These are form fitted plastic sheathes that are a perfect solution to decrease the chance of nuisance disconnections. Available in C14, C20 as well as C13 and C19 forms.
